

## **Cathy (Gien) (RIP)**

*by René (Chait) Sidley*

Cathy Gien had a very difficult life.

She suffered from breast cancer, but recovered somewhat and went into remission for a number of years.

Cathy had 3 children, the eldest, Gila, had a form of spina bifida and was quite deformed. Her son was fine, but her youngest daughter was mentally challenged.

Her mom died of colon cancer and Cathy and her sister were told to get checked. Cathy had it, and underwent surgery but sadly while recovering at home, her daughter Gila died in her sleep. Cathy started chemo a couple of weeks after that and within a very short period she died.

So, within one month, her mother, her daughter and she herself died.  
All three graves are together.
