

## Mike Myers

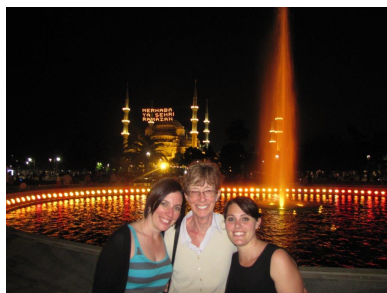

After school I spent 9 months in the Army (where I eventually graduated to Lance Corporal).

Then onto WITS for the next 5 years to get a degree in Mechanical Engineering – which I only practiced for a few years and I worked, initially, in the UK for 4 years as a Contacts Engineer.

In 1972 I married Janice (Mansel) and returned to SA later that year. I worked in engineering until 1976 and then moved into general management.

In Istanbul with son, Craig

Istanbul, l-to-r: Daughter Caryn, wife Janice, daughter-in-law Lesley

In 1989 I was elected President of the Institution of Mechanical Engineering which combined both technical and managerial skills. After several years of working for bosses, in 1990, we bought-out the company which, in turn, we sold in 1996 to an American organisation.

I consulted for a few years in business and marketing strategy and semi-retired about 5 years ago.

We have a place next to Kruger Park and spend quite a bit of time there and have become involved in conservation management. I am still involved in several Company Boards and play golf at least twice a week – if I can!

We have a daughter, Caryn – a lawyer running her own practice and a son Craig, daughter-in-law Les – both teachers, and a granddaughter, Kaylyn.

Mike

Craig (son), Kaylyn (grand-daughter), Lesley (daughter-in-law)
